Product Line Card

DuBois Sustainable Cleaning Solutions

Water/Wastewater Treatment

- **Powder in a Bag in a Box (PBB)** products eliminate drum handling and reduce freight, labor and disposal costs. They also reduce safety hazards and storage space concerns.
- **Dolphin** nonchemical water treatment eliminates shipping, handling, and storage of chemicals.
- **Wastewater Treatment** products ensure that what is released into the environment meets discharge requirements.
- **Modular Solutions** is our total systems approach that includes **Modu-Light™**, an ultraviolet technology which can eliminate the need for biocides.

Metal Cleaning and Pretreatment

- **Phosphate-Free Pretreatment** uses our Zirconization process which is a cost effective and high performing alternative to phosphate.
- **SurSolv** is a low operating temperature additive that contains no VOC's, no SARA reportables, and reduces waste discharge and water consumption.
- **Multi-TERJ®** metal cleaning products enable low temperature operation, reducing energy. They also increase worker safety by eliminating high pH detergents and lower maintenance costs by eliminating scale.
- **DuJel** rust and heat scale removal products reduce chemical use and waste.

Metalworking Fluids, Oils and Greases

- **Step One** lubricants eliminate downtime by cleaning while your equipment works. It contains no solvents, helps reduce parts replacement and is cost effective as it is only used at 5-10% concentration.
- **Polymer-Fortified** lubricants lower operating temperatures, extend oil/grease life and reduce amperage and leakage.
- **Double-Cut** metalworking fluids provide cooling and lubrication to a variety of metal surfaces and can be controlled mechanically.

General Cleaning

- **DuJel** versatile cleaning products have clinging action that save you money on labor by increasing cleaning turnaround, reducing rinse requirements and production and equipment downtime.
- **Treo** general purpose cleaner and neutral floor cleaner are recognized by the U.S. EPA's DfE Safer Product Labeling Program.

Transportation Cleaning

- **SuperSat® Custom Detergent Systems** provide superior cleaning performance with automatic drum-free product mixing of a full range of vehicle wash products including non-phosphate products. This two step system offers flexibility for the operator and reduces shipping costs and waste.
- **Red Rhino®** products offer a full range of polishes, conditioners, drying agents and protectants, including **Durashield® Total Car Protectant**, the only protectant with a 30-day guarantee.

Food Cleaning & Sanitation

- **ExteCon™** extended contact products cling longer and rinse easier than traditional OPC foam products therefore reducing rinsing and reapplication requirements, saving on water and chemical use.
- **TM Smart Track** dry conveyor lubrication reduces water usage by 90% compared to water diluted lubrication.

Paper Chemicals

- **Altrox™** cleaning products contain no chlorine and have less than 1% VOC's. They save time and money and eliminate discharge problems.
- **Vari-Clean™** systems eliminate waste by using an automated, touch screen controlled system, reducing totes of chemicals shipped by 60-80%.
