treo® Spray Wash Cleaners are Your Sustainable Solution!

Recognized by the EPA's Design for the Environment (DfE) Safer Product Labeling program, treo SW-61 and treo SW-89 are proven to be effective while minimizing environmental impact.

Benefits

- Readily biodegradable formula
- Phosphate-free
- Silicate-free
- Low volatility
- Low-foaming at low temperatures (i.e. > 90°F)
- No harmful solvents, no HAPs, and no ODCs
- Packaged using environmentally friendly materials
- Compatible with metals and plastics

treo® SW-61

- Mildly acidic spray wash cleaner
- Ideal when carryover to pretreatment stage is a concern

treo® SW-89

- Mildly alkaline spray wash cleaner
- Can be controlled by conductivity
- Better for removal of natural oils and fatty acids

Recognized for Safer Chemistry

The U.S. EPA's Design for the Environment program helps consumers, businesses, and institutional buyers identify cleaning and other products that perform well, are cost-effective, and are safer for the environment. For more information go to www.epa.gov/dfe.
