

treo® SW-89

DuBois

Mildly Alkaline Multi-Metal Spray Wash Cleaner

DESCRIPTION:

treo® SW-89 is a mildly alkaline spray wash cleaner for ferrous and nonferrous metals. It removes light to moderate oily soils such as cutting fluids, pressworking fluids, rust inhibitors, and shop soils.

KEY PROPERTIES:

- Low foaming at as low as 90°F (32°C), requiring low energy consumption
- Free-rinsing
- Mild alkalinity
- Readily biodegradable
- Silicate and phosphate-free
- No HAP's or ODC's

TECHNICAL DATA:

Color and Appearance	Clear, Amber Liquid
Odor	Mild
Specific Gravity	1.08
Density	8.97 lb/gal
pH	11.1
pH (1% sol'n with tap water)	10.1
Elemental Phosphorous	0%
Silicone-Free	Yes

RECOMMENDED USE:

For spray wash applications, treo® SW-89 is most effective at a concentration of 2-5% by volume. treo® SW-89 is typically used in the temperature range of 90°F to 130°F (32°C to 54°C). When processing multiple metals, it is recommended to keep the temperature at 120°F or less and a contact time of 1 minute or less to prevent aluminum etching.

For maximizing part cleanliness, treo® SW-89 should be followed by a clean water rinse. In every case, dry quickly to avoid flash rusting. If the parts are not going to be immediately painted, consult your DuBois representative

for the appropriate rust preventative to meet your corrosion protection requirements. To maximize bath life, mechanically emulsified, free-floating oil should be skimmed or otherwise removed from the bath during any shut down period.

DISPENSING:

treo® SW-89 can be easily dispensed and controlled. Consult your local DuBois representative for more information.

TEST METHOD:

Dropper Method:

1. Measure 50 mL of treo® SW-89 solution
2. Add 4-5 drops Bromphenol Blue indicator to solution and mix
3. Titrate by adding 2N Sulfuric Acid dropwise, mixing after each addition. Count the number of drops required to change the color from blue to yellow
4. % by volume = # of drops x 0.194
5. Thoroughly rinse vial and sampling dipper after each use

MATERIAL COMPATIBILITY:

treo® SW-89 is safe to use with ferrous metals such as iron and steel and with nonferrous metals like aluminum, zinc, and galvanized.

The following materials of construction have been tested and determined to be safe for use with treo® SW-89: Acetol Copolymer, Aflas, BUNA-N, CPVC, EPDM, Polyethylene LDPE, Polypropylene, Polyurethane, Polyethylene, PVC, Teflon (PTFE), Kynar (PVDF), and Viton.

The following materials of construction have been tested and determined to NOT be safe for use with treo® SW-89: PVC-flexible tubing and hypalon.

Mildly Alkaline Multi-Metal Spray Wash Cleaner

SAFE HANDLING & STORAGE CONDITIONS:

Before handling and using, the Safety Data Sheet (SDS) should be read and understood by all personnel in contact with this product. If frozen, thaw and mix to make usable.

DISPOSAL:

Any disposal of this product should be in compliance with all federal, state, and local regulations. All industrial solutions may require some treatment before discharge. DuBois offers full-service disposal and compliance consultation, backed by a full range of treatment chemicals. Detailed information is available from your DuBois representative.

PRECAUTIONS:

KEEP OUT OF THE REACH OF CHILDREN.

Please refer to the label and Safety Data Sheet (SDS) information for all warnings, recommendation for safety equipment, and other regulatory information. Copies of the Safety Data Sheet information can be ordered by calling 800-438-2647.

EPA PARTNERSHIP:

DuBois Chemicals has an established partnership with the U.S. EPA to formulate safer chemical products. Products with the Safer Choice label help buyers identify and select products with safer chemical ingredients, without sacrificing quality or performance.
